

## Shaswath S

Hello everyone!

I am Shaswath S, I joined FGS at my 8<sup>th</sup> grade not as a very smart kid but as an average student. But over an year of online and offline modes of classes I got used to the fiitjee culture. The next year my 10<sup>th</sup> grade started. Initially my performance wasn't very good but I didn't lose hope and my teachers also helped and supported me. Parallely our NTSE preparation was going on at a hectic schedule which gave heavy turbulence in our academic year at its first half. But unfortunately NTSE didn't happen last year and when we were informed of this our drive was now completely focused to CBSE Board preparations. We were given a well planned series of examinations (apart from our periodic test, preparatory test) such as Split exams, Revision exams, Pre Boards and Booster exams. And everytime after correction our teacher would help us understand our mistakes and helped us go further. Innovatively, our school send our Revision exam answer sheets to teachers outside the school simulating the board exam correction pattern. We were also given the luxury to stay at school during the study offs at the time of our exams and Board exams to clear our doubts and improve my performance. I would like to thank all my teachers

for continuous support and helped us clarify any sort of doubts even if it was late and also taught every chapter, every concept in a very detailed manner. Finally, I would thank my mother V.G. Vidyalakshmi and my dad D. Sivakumar for not pressuring me through my academic year and believing in me.

THANK YOU!

Shaswath S
